

Operating weight (canopy / cabin)	2120 / 2260 kg
Engine	3TNV76
Digging force (arm)	11,8 kN
Digging force (bucket)	18,6 kN

Reliability and compactness

© COMPACTNESS

The SV22 has been designed to meet all your requirements, and this while executing the most complicated jobs. Compact and lightweight, it can easily be transported on a trailer. Its stability and power enable it to work effectively regardless of the difficulty of your jobsite. The SV22 is intended for a wide range of applications such as urban renewal, grading or landscaping.

The YANMAR TNV engine has been designed to combine high power and cleaner emissions. With its sophisticated injection system, it meets the European Commission (EC) emission standards. Its quiet operation makes this engine friendly to people and environment.

Eco.e

Design and performance of the components made for heavy-dut inh sites and long service life

Simple maintenance structure for fast and easy access to all components. Facilitated daily checks.

CABIN

YANMAR

The use of a ROPS structure for the cab guarantees the operator safety in a roll-over. The canopy and cab also conform to FOPS1 standards (concerning structures protecting against falling objects) and TOPS (Tip Over Protective Structure).

EASE OF USE

Ideally located, the second gear control knob (located on the blade lever) and the control levers offer exceptional movement precision. A proportional control auxiliary line allows a perfect mastery of the accessories.

The SV22 cab interior architecture has been studied to improve the operator driving position and to facilitate his work, particularly on the long and challenging work sites.

COMPACTNESS AND VERSATILITY

THE YANMAR SV22 MINI EXCAVATOR WITH ULTRA-SHORT SWING RADIUS PROVIDES EASY ACCESS AND WORKS IN The tightest spots. It provides a power and an exceptional productivity which, associated to an excellent stability, allow you to work with confidence in all circumstances.

592

HIGH PERFORMANCE

BASED ON OUR UNIQUE EXPERIENCE AND EXPERTISE, YANMAR TECHNOLOGY ENSURES EXCELLENT PERFORMANCE WHILE RESPECTING THE ENVIRONMENT.

FLOW-SHARING CLOSED-CENTER Hydraulic system

The SV22 hydraulic circuit is characterized by the proportional distribution of the flow rates. The variable flow pump and the load sensing closed center circuit guarantee precision, flexibility, power and perfect simultaneity of movements. This system allows the operator to perform all movements with an excellent performance, regardless of the flow rate or the load. The joysticks are very easy to handle and makes operator control of the machine's work even easier.

EXCEPTIONAL STABILITY AND LIFTING STRENGTH

The combination of a wide counterweight, asymmetric crawlers (system patented by Yanmar VICTAS[®]), and excellent weight distribution provide the SV22 with an impressive level of stability and exceptional lifting capacities. The VICTAS[®] system consists in increasing the bearing surface by increasing the track path and using asymmetric crawlers. It provides increased lateral stability and lifting capacity, reduced track wear and quiet, vibration-free movement.

COMFORT

LARGE COMFORTABLE CABIN

The SV22 cab interior is very spacious for maximum freedom of movement. The large legroom allows the operator to work comfortably for long hours. The entrance, which is also very large, provides easy cab access and exit. The standard SV22 seat has a comfortable suspension with multiple adjustments and is equipped with a headrest to reduce operator stress and fatigue.

EXCELLENT AIR CIRCULATION

The SV22 has a heater that can work at a pleasant temperature in extreme weather conditions. The vents are placed to ensure a uniform temperature within the cabin and ensure a perfect window demisting.

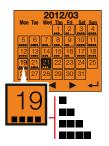

DIGITAL INTERFACE

The SV22 is equipped with a digital interface which informs the operator in real time about the status of his machine. Perfectly integrated into the right hand console, the 3.3" screen provides excellent visibility. The interface provides the customer with useful information through LED lamps, or indications about important elements like fuel consumption, fuel gauge, coolant temperature gauge, etc...

The interface assists the customer for maintenance intervals and to program such interventions. It also works as a diagnostic tool in case of malfunction by sending an error code and an information icon on the display.

SAFETY

Because one is more effective in a safe and secure environment, the safety of the operator and the people working around the machine is one of our priorities.

OPTIMUM VISIBILITY FOR EFFICIENT AND SAFE WORK

The SV22 is equipped with 3 rear and side view mirrors. The operator can control the work area as well as the area around the machine without moving from his seat. In order to work efficiently and accurately in darkness, the SV22 comes with a standard LED light positioned in the lower part of the boom, where it is protected from shocks. The LED technology provides a powerful light while reducing energy consumption and increasing the life of the battery. A beacon and 3 additional LED lamps can optionally be added on the cab.

MAINTENANCE AND RELIABILITY

The SV22 perfectly meets the reputation for quality and durability of the Yanmar machines. The excellent accessibility to components and speed of maintenance and cleaning operations allow achieving excellent levels of onsite availability.

DESIGNED TO LAST

- + Structure of the chassis and durable steel covers provide foolproof resistance.
- + Large counterweight protects against possible shocks and friction against the walls.
- + Hoses protection with abrasion-resistant sleeves. Routing on the top of the boom and on the right side of the machine to avoid risk of torsion and limiting machine down time.
- + Form stringers prevents accumulation of soil and reduces internal track wear.

EASY MAINTENANCE

The rear and side covers, the panel under the seat and the removable floor provide direct access to the service points to reduce the maintenance time and cost. The blade cylinder flexible is made of two parts for quick replacement in case of perforation.

EQUIPMENT

[STANDARD EQUIPMENT]

PERFORMANCE

3TNV76-SBVA2 Yanmar diesel | Meets EN standards | Indirect injection | Water separator | LUDV Hydraulic circuit: flow sharing | 1 auxiliary circuit with proportional control | 2nd speed | Hydraulic oil gauge | 1 LED light integrated into the boom

COMFORT

LCD Interface | Heating | Adjustable and reclining seat with fabric covers and headrest | Adjustable wrist support | Foot rests | Wide travel pedals | Windshield in 2 parts (retractable upper part) | Double sliding right side window | Transparent upper front part | Wipers | Windshield washer | Automatic ceiling lamp | 2 x 12V outlets | Storage boxes | Lockable document storage | Cup holder

SAFETY AND DURABILITY

Handrails | Safety lever | Safety belt | Hammer for evacuation | 3 mirrors | Travel beep | 4 anchor points (2 on the undercarriage, 2 on the blade) | Blade cylinder supply hose into two parts | Complete protection of the cylinders (blade, arm and boom) | Hoses protected by abrasion-resistant and projection-resistant sleeves | Bonnet and trapdoor of the fuel tank lockables | System antidrop for trapdoor of the fuel tank

MISCELLANEOUS

Fuel gauge | Locking covers | Tool kit | Grease pump

[OPTIONAL EQUIPMENT]

EQUIPMENT AND PERFORMANCE

Special paint | Quick couplings | Bio oil | 2 LED head lights on the front of the machine | 1 LED rear light + flashing LED light | ½ circuit

COMFORT AND EASE OF USE

Skaï seat | Radio with USB plug and SD card player | Centralised greasing

SAFETY AND DURABILITY

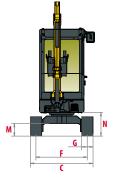

Safety valves for lifting + overload warning | Anti-theft (key/keyboard) | GPS Tracking | Travel alarm

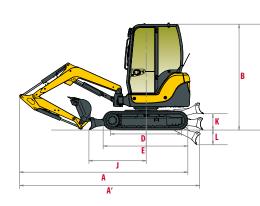

[ACCESSORIES]

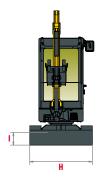

Yanmar gives you the accessories that fit your needs and match the safety standards in force in your country: mechanical quick coupler, ditching bucket, swinging bucket, backhoe bucket, hydraulic hammer...

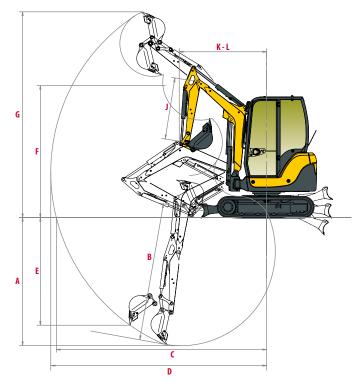

DIMENSIONS
